Civ. Action No. 13-cv-00469; The Thompsons / Eugene

Mr. [REDACTED],

Thank you for your phone call. A copy of the c [REDACTED] t at issue is attached. As discussed we would like to work with the City [REDACTED] track down and control the illegal activity associated with IP address [REDACTED]. Based on the activity of that IP address, a limited record attached, it is clear this is a substantial issue not only for our clients, but also for The City. Activity is recorded as recently as this morning, 3/28/13.

From the high volume of activity, this appears to be more than I would expect to see on a Library / Wi-Fi connection. It is certainly possible that some of this activity is related to a Wi-Fi connection, the massive volume of illegal activity goes beyond the occasional Wi-Fi user. If you would like, you can turn off the Wi-Fi connections for 48 hours and we will cooperatively check and see if that stems the activity. (Note: If there has been general disclosure of this crackdown to an infringer with the City, they are likely shutting down and deleting in a panic anyway.)

Note I also represent The Thomposns, LLC and there distribution of their film "The Thompsons" by on this IP. A review indicates this same IP address is listed as Doe No. [REDACTED] in that case. And while the infringement of my client's film Maximum Conviction was on Dec 20, the infringement noted for The Thompsons was on January 9, 2013. A copy of the Thompsons complaint is attached. There is a consistency in the use of the uTorrent 3.2.3 software. Which, while a popular client, reinforces the possibility that this is the same person involved with illegal activity over the City's network spaced out by several weeks.

I will call shortly to discuss.
