

IN THE UNITED STATES DISTRICT COURT FOR THE
NORTHERN DISTRICT OF CALIFORNIA
SAN FRANCISCO DIVISION

NEW SENSATIONS, INC.,

CASE No.: CV-11-2770-MEJ

Plaintiff,

vs.

MOTION TO QUASH OR MODIFY
SUBPOENA AND MOTION TO DISMISS

DOES 1-1474, (such persons being presently
unknown,

Defendants.

MOTION TO QUASH OR MODIFY SUBPOENA AND MOTION TO DISMISS

I received a letter from my ISP regarding a subpoena, which included a copy of the Order Granting Plaintiff's Application for Leave to Take Discovery.

From accounts of previous defendants of other copyright infringement lawyers, such as Steele Hansmeier, these subpoena notifications are followed by demand letters. These letters -- which usually demand amounts in the area around \$2500 - \$3000, to avoid dealing with their lawsuit¹ -- and their phone calls, which are persistent², are the reason I am filing this motion, and for this reason, I respectfully request that I be allowed to do so without revealing my personal identifying information.

Plaintiff may argue that this motion should be dismissed because of its anonymous filing. The reason for filing this motion anonymous is because I fear retaliation by Plaintiff. The nature of this fear is validated by a recent declaration filed by a copyright

¹Google search: "steele hansmeier letter"

²Google search: "steele hansmeier phone calls"

first create the management and logistical problems discussed above and then to offer to settle with Doe defendants so they can avoid digging themselves out of the morass plaintiff is creating.”

Similar cases to this one have been dismissed, such as *CP Productions, Inc. v. Does 1-300 case 1:2010cv06255*, and in this case the court notes before dismissal:

[I]f the 300 unnamed defendants have in fact infringed any copyrights (something that this court will assume to be the case, given the Complaint's allegations that so state), each of those infringements was separate and apart from the others. No predicate has been shown for thus combining 300 separate actions on the cheap -- if CP had sued the 300 claimed infringers separately for their discrete infringements, the filing fees alone would have aggregated \$105,000 rather than \$350.

Later, Judge Milton Shadur writes about Steele Hansmeier's abuse of the litigation system “in more than one way” with its “ill-considered” lawsuit:

This Court has received still another motion by a “Doe” defendant to quash a subpoena in this ill-considered lawsuit filed by CP Productions, Inc. (“CP”) against no fewer than 300 unidentified “Doe” defendants – this one seeking the nullification of a February 11, 2011 subpoena issued to Comcast Communications, LLC. This Court’s February 24, 2011 memorandum opinion and order has already sounded the death knell for this action, which has abused the litigation system in more than one way. But because the aggrieved Doe defendants continue to come out of the woodwork with motions to quash, indicating an unawareness of this Court’s dismissal of this action, 1 CP’s counsel is ordered to appear in court on March 9, 2011 at 9:00 a.m. Counsel will be expected to discuss what steps should be taken to apprise all of the targeted “Doe” defendants that they will not be subject to any further trouble or expense as a result of this ill-fated (as well as ill-considered) lawsuit.

(CP Productions, Inc. v. Does 1-300 case 1:2010cv06255 (dismissed ALL John Doe defendants))

In another Steele Hansmeier BitTorrent case in Illinois, Judge Harold A. Baker writes in denying the motion for expedited discovery:

Plainly stated, the court is concerned that the expedited *ex parte* discovery is a fishing expedition by means of a perversion of the purpose of and intent of Fed.

infringement lawyer in Virginia, *Declaration in Support of Motion for Reconsideration and Response to Show Cause Order, 10 Oct 11, Patrick Collins v. John Does 1-58, 3:11-cv-00531-JAG* (Exhibit A).

Plaintiff was voluntarily dismissing movants who were seeking to sever Doe Defendants and suing each of them individually in hopes that by doing so, it would cause future Doe Defendants in similar litigations in this District and around the country to stop filing these motions.

By filing this motion, I draw attention to Plaintiff's questionable action of how they pursue this and other copyright infringements cases. If I filed this motion under true name, I feel I would be singled out by Plaintiff for selective prosecution. The prosecution would not be because of the alleged copyright infringement, but to serve as an example to other defendants who do not settle with Plaintiff regardless of guilt or innocence. The fear of retaliation is so great that I have mailed this motion to the court and Plaintiff from a location other than my own.

INTRODUCTION

To cut court costs while suing as many individuals as possible, Plaintiff's counsel, Ira M. Siegel (Law Offices of Ira M. Siegel) is using improper joinder in this mass lawsuit alleging copyright infringement through BitTorrent.

In a recent order (6 Sep 2011) by Judge Bernard Zimmerman, Northern District of California, 5010 John Does were dismissed from an Ira Siegel case, *On The Cheap, LLC, v. Does 1-5011, case C10-4472 BZ*, due to improper joinder. Judge Zimmerman stated the following in his order:

“This Court does not condone copyright infringement and encourages settlement of genuine disputes. However, Plaintiff's desire to enforce its copyright in what it asserts is a cost-effective manner does not justify perverting the joinder rules to

R. Civ. P. 23.

VPR Internationale vs. Does 1-1017 case 2:2011cv02068

In the Northern District of California, these nearly identical BitTorrent cases have been severed for improper joinder:

Pacific Century International LTD v. Does 1-101 case 4:2011cv02533 (severed Does 2-101)

IO Group, Inc. v. Does 1-435 case 3:2010cv04382 (severed Does 2-435)

Diabolic Video Productions, Inc v. Does 1-2099 case 5:2010cv05865 (severed Does 2-2099)

New Sensations, Inc v. Does 1-1768 case 5:2010cv05864 (severed Does 2-1768)

In yet another nearly identical BitTorrent case, filed in the Northern District of California by Steele Hansmeier, *Millennium TGA, Inc v. Does 1-21, case 3:2011cv02258*, Judge Samuel Conti found the same joinder problems, and wrote in his order denying request for leave to take early discovery, "This Court does not issue fishing licenses;" And these nearly identical BitTorrent cases in the Northern District of California by the same plaintiff Boy Racer, again represented by Steele Hansmeier, have been severed for improper joinder:

Boy Racer, Inc v. Does 1-52 case 5:2011cv02329 (severed Does 2-52)

Boy Racer, Inc v. Does 1-71 case 5:2011cv01958 (severed Does 2-72)

ARGUMENTS

- 1. Plaintiff Has Improperly Joined 1474 Individual Defendants Based on Entirely Disparate Alleged Acts**
- 2. Plaintiff Has Not Done Significant Investigative Effort to Justify Granting a Subpoena For Subscriber Information From the Internet Service Provider**

Plaintiff's joinder of 1474 defendants in this single action is improper and runs the tremendous risk of creating unfairness and denying individual justice to those sued. Mass joinder of individuals has been disapproved by federal courts in both the RIAA cases and elsewhere.

As one court noted:

Comcast subscriber John Doe 1 could be an innocent parent whose internet access was abused by her minor child, while John Doe 2 might share a computer with a roommate who infringed Plaintiffs' works. John Does 3 through 203 could be thieves, just as Plaintiffs believe, inexcusably pilfering Plaintiffs' property and depriving them, and their artists, of the royalties they are rightly owed. . . .

Wholesale litigation of these claims is inappropriate, at least with respect to a vast majority (if not all) of Defendants.

BMG Music v. Does 1-203, No. Civ.A. 04-650, 2004 WL 953888, at *1 (E.D. Pa. Apr. 2, 2004) (severing lawsuit involving 203 defendants).

Rule 20 requires that, for parties to be joined in the same lawsuit, the claims against them must arise from a single transaction or a series of closely related transactions.

Specifically:

Persons . . . may be joined in one action as defendants if: (A) any right to relief is asserted against them jointly, severally or in the alternative with respect to or arising out of the same transaction, occurrence, or series of transactions or occurrences; and (B) any question of law or fact common to all defendants will arise in the action. Fed. R. Civ. P. 20.

Thus, multiple defendants may be joined in a single lawsuit only when three conditions are met:

(1) the right to relief must be "asserted against them jointly, severally or in the alternative"; (2) the claim must "aris[e] out of the same transaction, occurrence, or series of transactions or occurrences"; **and** (3) there must be a common question of fact or law common to all the defendants. *Id.*

Joinder based on separate but similar behavior by individuals allegedly using the Internet to commit copyright infringement has been rejected by courts across the country. In *LaFace Records, LLC v. Does 1-38*, No. 5:07-CV-298-BR, 2008 WL 544992 (E.D.N.C. Feb. 27, 2008), the court ordered severance of lawsuit against thirty-eight defendants where each

defendant used the same ISP as well as some of the same peer-to-peer (“P2P”) networks to commit the exact same violation of the law in exactly the same way. The court explained: “[M]erely committing the same type of violation in the same way does not link defendants together for purposes of joinder.” *LaFace Records*, 2008 WL 544992, at *2. In *BMG Music v. Does 1-4*, No. 3:06-cv-01579-MHP, 2006 U.S. Dist. LEXIS 53237, at *5-6 (N.D. Cal. July 31, 2006), the court *sua sponte* severed multiple defendants in action where the only connection between them was allegation they used same ISP to conduct copyright infringement. See also *Interscope Records v. Does 1-25*, No. 6:04-cv-197-Orl-22DAB, 2004 U.S. Dist. LEXIS 27782 (M.D. Fla. Apr. 1, 2004) (magistrate recommended *sua sponte* severance of multiple defendants in action where only connection between them was allegation they used same ISP and P2P network to conduct copyright infringement); *BMG Music v. Does 1-203*, No. Civ.A. 04-650, 2004 WL 953888, at *1 (E.D. Pa. Apr. 2, 2004) (severing lawsuit involving 203 defendants); General Order, *In re Cases Filed by Recording Companies*, filed in *Fonovisa, Inc. et al. v. Does 1-41* (No. A-04-CA-550 LY), *Atlantic Recording Corporation, et al. v. Does 1-151* (No. A-04-CA-636 SS), *Elektra Entertainment Group, Inc. et al. v. Does 1-11* (No. A-04-CA-703 LY); and *UMG Recordings, Inc., et al. v. Does 1-51* (No. A-04-CA-704 LY) (W.D. Tex. Nov. 17, 2004), RJN Ex. A, (dismissing without prejudice all but first defendant in each of four lawsuits against a total of 254 defendants accused of unauthorized music file-sharing); Order Granting in Part and Denying in Part Plaintiffs’ Miscellaneous Administrative Request for Leave to Take Discovery Prior to Rule 26 Conference, *Twentieth Century Fox Film Corp., et al., v. Does 1-12*, No. C-04-04862 (N.D. Cal Nov. 16, 2004) (in copyright infringement action against twelve defendants, permitting discovery as to first Doe defendant but staying case as to remaining Does until plaintiff could demonstrate proper joinder).

Plaintiff may argue that, unlike the RIAA cases, its allegations here are based upon use of the Internet to infringe a single work. While that accurately describes the facts alleged in this case, it does not change the legal analysis. Whether the alleged infringement concerns a single copyrighted work or many, it was committed by unrelated defendants, at different times and locations, sometimes using different services, and perhaps subject to different defenses. That attenuated relationship is not sufficient for joinder. See *BMG Music v. Does 1-203*, 2004 WL 953888, at *1.

Nor does the analysis change because the BitTorrent protocol works by taking small fragments of a work from multiple people in order to assemble a copy. Nearly all of the older protocols in the aforementioned cases work in this fashion. Kazaa, eDonkey and various Gnutella clients (e.g., LimeWire) have incorporated multisource/swarming downloads since 2002.³

Plaintiff claims all of the defendants are properly joined because they illegally downloaded/shared the film (*Big Bang Theory A XXX Parody*) via BitTorrent. Plaintiff provided the Court Exhibit A to their Complaint listing all the IP addresses of the defendants and a specific date/time (U.S. Eastern Time), it was observed illegally downloading/sharing the film. John Doe #547 (IP address 67.164.99.61) was the first instance of downloading/sharing by defendants identified by plaintiff's agents on 12/05/2010 at 19:08:05 U.S. Eastern Time. The last instance of downloading/sharing identified by Plaintiff's agents was on 5/31/2011, at 00:56:07 ET, by John Doe # 1443 (IP address 98.239.118.245). Plaintiff incorrectly states the infringement was accomplished by the Defendants "acting in concert with each other." Exhibit A to the complaint shows the entire timeframe of the activity (5 Dec 10 – 31 May 11),

³<http://gondwanaland.com/mlog/2004/12/30/deployment-matters/>

but not which IP addresses actually acted in concert. The nature of BitTorrent does not support Plaintiff's claim that All John Doe IP addresses acted together for the entire period of approximately six months.

The nature of BitTorrent is that the work in question is first made available to other BitTorrent users by a small number, usually one IP address. As other BitTorrent users join and start to download/share the work, the swarm grows. Depending on how popular the work is, the swarm can grow fast, or not at all. Eventually as the popularity of the shared work drops, the swarm shrinks, and eventually disappears. IP addresses commonly join and leave various BitTorrent swarms at all times during the life of the torrent.

In the January 2011 Technical Report: *An Estimate of Infringing Use of the Internet*, by *Envisional*⁴ (a major company specializing in detecting and guarding against the threats of counterfeiting, piracy, fraud and online brand abuse), the following was noted for the single day analysis of BitTorrent use:

For the 2.72 Million torrents identified, only .2% had 100 or more downloaders. 2.6% of the torrents had 10-99 downloaders. 51.9% of the torrents had from one to nine downloaders. 45.2% had no active downloads. Envisional also noted that a similar spread of "seeders" (users with a complete copy of the work) were associated with the torrents. For 48.5% of the torrents, there were no seeders connected. (Page 9)

This report clearly shows the vast majority of torrents only had zero to nine downloaders associated with them and a very limited number of file seeders at any one instance. Only .2% of the torrents had 100 or downloaders and similar numbers of seeders.

Plaintiff has also improperly joined many IP addresses (Doe Defendants) that do not reside within the jurisdiction of the court. Plaintiff conducted only a cursory collection of IP

⁴http://documents.envisional.com/docs/Envisional-Internet_Usage-Jan2011.pdf

addresses and did not try to determine where the IP addresses are physically located. Even with their limited IP addresses analysis, Plaintiff should have been able determine that many of the IP address were not within the court's jurisdiction. A simple freely available IP address geo-location Web site, such as <http://www.geobytes.com/lpLocator.htm> should have been used to validate the proper jurisdiction for each IP address. Geo-location of John John Doe #411 (IP address 24.2.38.235), shows it as being located in Sacramento, CA (Jurisdiction of the Eastern District of California. Plaintiff knows that many of the Doe defendants do not reside within the court's jurisdiction, but they still improperly joined them together to obtain subscriber information from the ISPs. Many of the Courts that previous heard these types of mass copyright infringement cases have correctly named this activity as a "Fishing Expeditions" for subscriber information. Plaintiff has no intention of naming any of the Doe defendants, much less bringing them to an actual trial after they obtain this information and settlement efforts fail. Plaintiff will use the subscriber information obtained from the ISPs to send out settlement letters attempting to scare Doe defendants into paying a couple thousand dollars to make the case go away, regardless of truly being guilty. The current state of mass copyright infringement cases in the US clearly shows this is the standard business model for these types of cases. On 5 Oct 11, these types of unethical actions were highlighted in an order by Judge John A. Gibney, Eastern District of Virginia, in K-Beech vs Does 1-85, 3:11cv469-JAG:

This course of conduct indicates that the plaintiffs have used the offices of the Court as an inexpensive means to gain the Doe defendants' personal information and coerce payment from them. The plaintiffs seemingly have no interest in actually litigating the cases, but rather simply have used the Court and its subpoena powers to obtain sufficient information to shake down the John Does. Whenever the suggestion of a ruling on the merits of the claims appears on the horizon, die plaintiffs drop the John Doe threatening to litigate the matter in order to avoid the actual cost of litigation and an actual decision on the merits.

Discussions of the technical details of the BitTorrent protocol aside, the individual Defendants still have no knowledge of each other, nor do they control how the protocol works, and Plaintiff has made no allegation that any copy of the work they downloaded came jointly from any of the Doe defendants. Joining unrelated defendants in one lawsuit may make litigation less expensive for Plaintiff by enabling it to avoid the separate filing fees required for individual cases and by enabling its counsel to avoid travel, but that does not mean these well-established joinder principles need not be followed here.

CONCLUSION

The improper joining of 1474 Doe defendants into this one lawsuit raises serious questions of individual fairness and individual justice. As noted by previous courts, the use of these cases (and the courts) as a means of obtaining subpoenas to issue settlement letters is well documented (“Fishing Expeditions”). Even when John Doe defendants choose not to settle, the plaintiffs in these cases ultimately fail to name defendants and start further court actions.

Many of these types of cases are kept open for as long as possible so the plaintiffs can obtain as much settlement money as possible, before they voluntarily dismiss the case and move onto a new one. One court recently likened the activity by copyright infringement lawyers as a shakedown of the defendants, not a good faith effort in litigation (*3:11cv469-JAG, K-Beech vs Does 1-85*). Recent developments in a Steele Hansmeier PLLC Case (*1:10-cv-06254, First Time Videos v. Does 1-500*), is a prime example where Plaintiff kept the case open for a year without naming a defendant. The Plaintiff eventually dismissed the case entirely after receiving subscriber information on the remaining Doe Defendants. There is a well-documented history of these types of cases in the Northern Districts of Illinois and California.

As noted in the Envisional technical report, majority of the BitTorrent swarms they sampled had only Zero to Nine downloaders and a similar number of “seeders.” A total of 1474 BitTorrent downloaders and “seeders” all connected at once over a period of almost six months, is highly unlikely. According to the Envisional technical report, only .2% had 100 or more downloaders at one time. Plaintiff’s records do not show how any of the IP addresses they identified interacted with each other (sharing the file in question).

The court should also note the very cursory effort Plaintiff has taken to identify the true copyright infringers. As the IP address assigned to each defendant does not equal culpability, simply going after the registered owner of the IP address is irresponsible. The registered user of the IP address only identifies the person who pays the Internet Service Provider (ISP) for Internet access. There are multiple possibilities as to why the defendant did not copyright infringe against Plaintiff. Possible reasons are: computer/network was “hacked” by unauthorized personnel; Home WiFi connection run “Open” and used by unauthorized personnel (neighbor, etc.); Guest at the defendant’s residence used the network and defendant

was not aware of the activity. Without additional investigative steps, innocent personnel are bound to be implicated in infringement activity and pressured to pay settle amounts to make the threat of a federal law suit go away.

As Plaintiff does not intend to conduct further investigative effort and only wishes to send out settlement letters to defendants, I respectfully request the Court dismiss the subpoena requiring the ISP provide the subscriber information on all John Doe defendants. In addition, I respectfully request the court sever Doe defendants 2-1474 from this case, as there is no evidence to show that ALL the Doe defendants acted together are thus they are incorrectly joined together. *See* Fed. R. Civ. P. 21.

UNITED STATES DISTRICT COURT
FOR THE EASTERN DISTRICT OF VIRGINIA
RICHMOND DIVISION

PATRICK COLLINS, INC.,

Plaintiff,

v.

JOHN DOES 1-58,

Defendants.

CASE NO. 3:11-cv-00531-JAG

**DECLARATION IN SUPPORT OF MOTION FOR RECONSIDERATION AND
RESPONSE TO SHOW CAUSE ORDER (DOCKET # 22)**

I, D. WAYNE O'BRYAN, DO HEREBY DECLARE:

1. My name is D. Wayne O'Bryan and I am over the age of 18 and am otherwise competent to make this declaration.
2. I have been retained by Plaintiff in this matter.
3. I have personal knowledge of the facts stated in this declaration.
4. Plaintiff and I *sincerely* apologize to the Court for not explaining the litigation strategy set forth in this declaration via a notice which could have been filed in advance of the Court issuing its show cause order.
5. Plaintiff was voluntarily dismissing movants who were seeking to sever Doe Defendants and suing each of them individually in the hopes that by doing so it would cause future Doe Defendants in similar litigations in this District and around the country to stop filing these motions.
6. Plaintiff and undersigned genuinely believe these motions to quash are filed in bad faith and that none of the movants seeking severance sincerely want to be sued in an

individual suit because it costs more and therefore the settlement amount necessarily must higher.

7. According to Graham Seifert, one of the primary author of these motions, “[m]y dream would be to have 10,000-20,000 people file all three documents to the lawyers and severely cripple the entire process.” See <http://lawvibe.com/uscg-sues-bittorrent-users-graham-syfert-of-affinity-law-firm-defends/>.

8. A simple internet search reveals that there are numerous BitTorrent Defense Kits available which promote these types of motions and that there are innumerable free internet interest groups also promoting these types of motions.

9. These motions will not work because the problem for copyright owners is too substantial. Nevertheless these motions are expensive to defend against. Indeed, many intentionally raise issues that have absolutely nothing to do with the subject matter before the court thus requiring Plaintiff to spend resources arguing against abstractions.

10. Plaintiff has received hundreds and hundreds of cut and paste motions to sever and/or quash in similar litigations across the country.

11. The cut and paste motions have been put on BitTorrent and other websites containing instructions on how to complete these and are being downloaded by the Doe Defendants and their counsel in these matters. See <http://www.kat.ph/search/law%20firm/>. Accord Maverick Entertainment Group, Inc. v. Doe --- F.Supp.2d ---, 2011 WL 1807428 (D.D.C. 2011) finding “the Court recognizes that “at least two” putative defendants (Jasmin Silva, ECF Nos. 56; Mark Benavides, ECF No. 92) have “substantially copied” and filed briefs prepared and submitted by attorney Eric J. Menhart on behalf of his five clients: Xiangping Xu (ECF No. 56), Lori Pearlman (ECF No. 58), Cedric Johnson (ECF Nos. 14, 60), Antonio Forte

(ECF No. 85), and Darrin Ross (ECF No. 108). *See* Eric J. Menhart's Notice re: Unauthorized Copying of Brief, ECF No. 124. Like Mr. Menhart, the Court notes the "irony" of such actions in a lawsuit involving copyright infringement."

12. The law firm of Fletcher, Heald & Hildreth, PLC weighed in with further analysis about motions to quash asserting that "any bump in the litigation road costs money and devalues the lawsuit." See <http://www.commlawblog.com/2011/04/articles/intellectual-property/trolls-on-a-roll/>.

13. Plaintiff has every intention of suing every one of the movants that file a motion to sever and proceeding to trial if necessary.

14. Plaintiff was not dodging the joinder argument because it was afraid to make it; indeed, Plaintiff had already made and won the joinder in this District.

15. From reports received by Plaintiff's investigator, IPP Limited, undersigned knows that Plaintiff's movies are being illegally downloaded through the BitTorrent peer-to-peer file sharing protocol by people residing in the U.S. well over 100,000 times a month.

16. For example, through similar copyright infringement suits filed by Plaintiff's lawyers across the country, a police department running a covert investigation was identified as a John Doe defendant; Plaintiff voluntarily dismissed that John Doe. Many John Doe defendants are destitute and therefore not worth suing. Several of the John Doe Defendants have died prior to being identified. Several John Does have been public or political figures who Plaintiff did not to choose to sue.

17. Plaintiff loses 10-15% of the Doe Identities it subpoenas nationally due to ISP data failure or deletion issues.

18. Due to the dynamic ISP issue, Plaintiff has sued the same Doe Defendant innumerable times several joined suits across the country.

19. Plaintiff did not call any of the Doe Defendants in this case prior to being called by them in response to the subpoena notices that the Doe received. The Doe Defendants that called Plaintiff generally wanted to discuss settlement options.

20. Plaintiff has not sent out any demand letters to the Doe Defendants in this case.

21. From statistics suing 1000s of people nationally, Plaintiff knows that in any given joined suit 35-55% of the Doe Defendants will settle very early in the litigation.

22. The settlement demands that Plaintiff makes of the Doe Defendants is consistent with the low end of the amounts awarded in the Capitol and Sony cases plus the legal fees and costs associated therewith.

23. Increasing the costs associated with this litigation by forcing Plaintiffs to file individual suits would only increase the settlement demands, make settlements less probable.

24. The amount of the labor and expense associated with BitTorrent peer-to-peer copyright litigation may make it prohibitively expensive to sue IP addresses prior to knowing that any particular IP address resolves to a solvent individual who could be served.

25. Plaintiff intends to show the jury the torrent website from which Defendants downloaded Plaintiff's movie, which contains movies currently out in theaters and songs no rational person would think are available for free.

26. Plaintiff's investigators use the Hash Value as a digital fingerprint that enables Plaintiff to ensure that all of the infringements alleged in this suit come from the exact same torrent file. Significantly, many of Plaintiff's movies are turned into numerous different torrent files. Plaintiff has not combined infringers of different torrents of the same movie into this suit.

FURTHER DECLARANT SAYETH NAUGHT

ATTESTATION

PURSUANT TO 28 U.S.C. § 1746, I declare under penalty of perjury that the foregoing is true and correct.

Dated this 10th day of October 2011.

By: _____

D. Wayne O'Bryan, Esq.
